

Ranco ETC-142000-000 Addendum:

The Ranco ETC-142000-000 is a single stage 24VAC digital temperature controller in a NEMA 4X case. Since the manufacturer doesn't offer such a control, these are assembled in house from the electrical components of the ETC-112000-000 and the NEMA 4X case as is on the the ETC-141000-000.

For electrical specifications see the installation instructions for the ETC-112000-000 24VAC digital temperature controller.

For mounting and installation instructions regarding the NEMA 4X controller, see the installation instructions for the ETC-141000-000 single stage NEMA 4X temperature controller.

For programming instructions see either set of installation instructions.
